

## Climate Change Leadership – Power, Politics and Culture, 2012

### ASSIGNED READING INSTRUCTIONS

The purpose of the assigned course readings is to prepare you for, and give you insight into, the issues that will be raised and discussed in the lectures. It may consist of a series of articles, academic essays, reports, scientific papers, newspaper articles as well as definitions of key concepts, initiatives and institution. Please try to read the articles before the lecture, and think critically about the information they contain. All written assignments will require referencing of literature.

With the aim of giving you the choice to read articles online and thus avoid the need for printing the course reader, we have included links where possible (see below). Note that some articles have restricted access, and therefore must be downloaded while logged into the university system. Some others are not available online (e.g. book chapters). Here you will need to read them in the CEMUS library, or borrow a course reader from a friend. Some of these books may be available in the CEMUS library also.

If you have problems accessing any of the readings, please let us know! Good luck.
