

Extra task for missed seminar on *Climate Wars*

This extra task is a little bit different since the seminar was a literature seminar on the book *Climate Wars* by Harald Welzer.

Write minimum 1500 words on the points below. You need to answer all the questions fully, but you can choose to put more energy and words on a specific one.

When finished, send the extra task to malin.ostman@csduppsala.uu.se

- According to Welzer, what are the major difficulties humanity are facing in relation to the future? Do you agree with him?/ Why/Why not?
- Choose a quotation from the book and motivate your choice.
- Use this quotation and formulate a “research question” (something you think would be interesting to pursue) you find relevant in relation to the quotation and the book in general. Motivate your answer.
- Write a review of the book relating to its potential relevance for your education. Use references and voice your own opinion, but be sure to be clear with references and arguments.

Good luck and have fun!/Malin
