

## **Instructions peer reading of Assignment 1**

In addition to uploading assignment 1 to the student portal, you shall also send your assignment to the group members you were given e-mail addresses to (on September 26<sup>th</sup>). Send your assignment to your group no later than assignment deadline. This should mean that you will send your assignment to 3-4 people, and also get 3-4 assignments to read before the seminar on October 3<sup>rd</sup>.

### **When reading your peers work focus on the following:**

- Interesting points you agree/disagree with
- Similarities/differences from your own paper
- 1 point that could be improved in the text
- 1 point that were really good in the text

It's best if you take some notes that you can give to your group members when you meet. You could also give the comments in an e-mail. At the seminar you will be in your groups and discuss your comments together. If for some reason you don't send your paper to your peers, please let me know. You can still comment on the papers you are given though.

Good luck and let me know if you have any questions! / Malin
