

Instructions - Student lectures

As part of this fall course, and the examination, you will hold a mini lecture/presentation in front of your classmates. The purpose of this is to use your experiences and capabilities. Take the opportunity to present something that matters to you, in relation to sustainability – using the instructions below.

There will be two different opportunities to present during the course of the fall, either October 11th, or **November 15th**.

You will give your talk to a group of fellow students, and not the whole class.

- The topic should be *“My worldview and sustainability”*
- The presentation should be no more than 10-15 minutes (including questions).
- Use a way of presenting you find conveys your message the best, out-of-the-box–thinking is encouraged – however you will not be able to use a big classroom/projector.
- In addition to the presentation, you must also send in a short description of what you have presented, why, and how you felt it went. Send this to me via e-mail. Use malin.ostman@csduppsala.uu.se
This description should be written in a word-document or pdf. It should be no less than 400 words and it should be sent no later than 2 weeks after your presentation.

Remember to have fun, take the opportunity to discuss what you really think matters, and e-mail me with any questions you might have!
